**LIST OF ABNORMALITIES:** Lesion (open sores), Tumour, Cyst, Crooked Back, Fin shape is not normal, missing fin, Big heads with little bodies, Eyes that stick out, Not normal shaped heads and jaws, Not normal colour or spots, Missing scales, If "other," please describe:

**WHERE WERE THE FISH CAUGHT?** (please provide geographic coordinates if possible). It's best if you take a picture of your GPS where the fish was caught, and then take a picture of the fish.

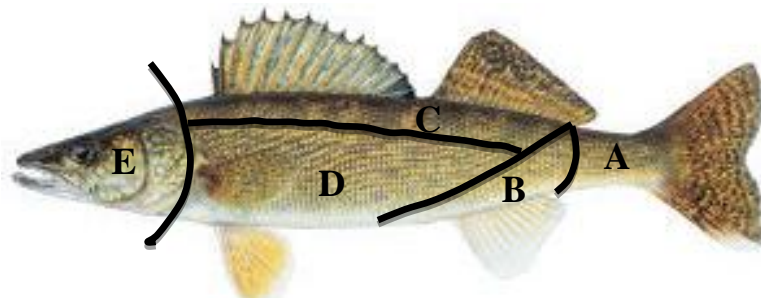

**WHAT WAS THE WATER TEMPERATURE AND WEATHER?**

**WAS THE FISH ACTING STRANGELY?** (for example, gulping for air at the surface, swimming in circles?)

For each fish that you caught that was NOT NORMAL, please fill in the information below (use more sheets if you catch more than 4 abnormal fish)

	Abnormal Fish 1	Abnormal Fish 2	Abnormal Fish 3	Abnormal Fish 4
Fish Number (if there is one)				
Species				
Fork length (cm)				
Weight (g)				
What is wrong with the fish? Describe in your own words or using the list provided above and below.				
Where on the fish is the problem (see diagram below)?				
If there are lesions or tumours, how many are there?				
Please take a photo of the fish that has something else in the picture, like a ruler or jackknife, and <b>record the photo numbers here</b>				

Lesion (open sores), tumour, cyst (looks like a blister), crooked back, fin shape not normal, missing fin, big heads with little bodies, eyes that stick out, not normal shaped heads and jaws, not normal colour or spots, missing scales

This form, digital pictures, & questions can be emailed to: [Erin\\_Kelly@gov.nt.ca](mailto:Erin_Kelly@gov.nt.ca). Please email Erin to check where you should send the fish that you captured, and make sure to label the bag the fish is in with the date and where the fish was caught so we can match the pictures to this form.
