Northwest Territories
Summary of
Hunting and Trapping Regulations
July 1, 2020 - June 30, 2021
HUNTING IN THE NORTHWEST TERRITORIES AND COVID-19

This document was printed in May 2020 for the 2020-21 hunting season. At the time of printing, several public health orders were in place for the Northwest Territories (NWT) to limit the spread of COVID-19.

For current health orders and advice, consult with the Health and Social Services website: www.hss.gov.nt.ca/covid-19.

It is recommended that hunters in the NWT continue to follow best practices to stay healthy and limit the spread of COVID-19:

- Only go on the land with people you live with, and avoid social gatherings, even outside.
- Do not stand or sit close together with anyone you do not live with. Keep two metres (6 feet) apart at all times.
- No visitors in your camp or tent.

NON-RESIDENT HUNTERS

At the time of printing, all big game hunting and outfitting for non-residents was closed by order of the Chief Public Health Officer. Non-resident hunters should ensure they are aware of the latest restrictions before booking any trips to the Northwest Territories.

Current advisories and updates to GNWT services can be found at: www.gov.nt.ca/covid-19.
This booklet is not a legal document nor a complete listing of the current hunting regulations. The hunting maps are not legal documents, but are included for reference to give a general outline of hunting areas in the NWT.

Amendments to regulations may be made after the printing of this booklet. For more information and updates, contact a Renewable Resource Officer near you, or check our website.

**Note:** If the harvester is not listed in the table then harvesting of the species is unavailable.

The Department of Environment and Natural Resources (ENR) has various booklets and videos you may find useful while visiting the NWT such as *Safety in Black and Grizzly Bear Country* and *A Field Guide to Common Wildlife Diseases in the NWT*. Please visit our website for further information on how to obtain copies of these documents.

For a complete list of territorial hunting regulations, visit our webpage at [www.enr.gov.nt.ca](http://www.enr.gov.nt.ca).
WILDLIFE REGULATION
UPDATES

Hunter Education Course
As of January 1, 2020, all resident and non-resident hunters are required to take Hunter Education training prior to being issued a hunting licence in the NWT, under the Wildlife Act, unless they are exempt in the regulations (for example, persons who have engaged the services of a licenced guide or outfitter to accompany them while hunting).

Persons may also be required to take the course if convicted of a wildlife offense.

Check the ENR website for more information: www.enr.gov.nt.ca/huntereducation

Boreal Caribou
There are new season requirements and conditions for General Hunting Licence and Resident Hunting Licence holders when hunting boreal caribou. Harvest is now male only and the season closes December 15th.

Muskox
There will be new hunting opportunities for harvesting muskox in U/MX/01 for Resident Hunting Licence holders through a limited entry draw and for Non-resident or Non-resident Alien Licence holders through an outfitter. For more information contact ENR and see the species page 44.

Drone Assisted Hunting
All General Hunting Licence, Resident Hunting Licence, Non-resident, Non-resident Alien Licence, and Special Harvester Licence holders are prohibited from the possession, use or assistance of a drone (also known as Unmanned Aerial Vehicles or Remotely Piloted Aircraft Systems) while hunting wildlife in the NWT.

Fur Trappers Notice
If you have an Aboriginal or Treaty rights to harvest in a particular area of the NWT you no longer need a licence to exercise that right; however, you must be able to show a Renewable Resources Officer identification that proves you have the right to harvest in that area when requested.

Some land claim agreements in the NWT include an exclusive right for beneficiaries to harvest furbearers in certain areas. This means that licenced hunters cannot harvest some species without permission from the land claim organization.

It is unlawful for any person to use traps not listed in the regulations. Only approved certified traps approved listed in the Agreement on International Humane Trapping Standards may be used in the NWT.

For more information, please visit our website at www.enr.gov.nt.ca or be sure to obtain a copy of the annual NWT Trapper’s calendar.

GENERAL INFORMATION
During the hunting season, Renewable Resource Officers inspect hunters for compliance with hunting regulations at check points, border crossings and in hunting areas throughout the NWT.

Licence Requirements
1. General Hunting: An Aboriginal person that is a member or eligible to be a member of an NWT organization listed in the regulations.

2. NWT Resident: A Canadian citizen or landed immigrant who has been living in the NWT for 12 continuous months.

3. Non-resident: A Canadian citizen or landed immigrant who lives outside the NWT or has not resided in the NWT for 12 months.

4. Non-resident Alien: An individual who is neither a NWT resident nor a non-resident.

5. Aboriginal harvesters who do not have traditional harvesting rights in the NWT need a Resident or Non-resident Hunting Licence.

Special Harvester Licences
A Special Harvester Licence (SHL) can be issued to a person who does not have Aboriginal harvesting rights in an area but is supporting an Indigenous family, living a subsistence lifestyle, or given permission to trap or harvest more than is allowed under a Resident or Non-resident Hunting Licence, or a General Hunting Licence.

An SHL cannot be used to harvest outside of harvest seasons, limits or conditions applicable to Aboriginal harvesters established in the Big Game Hunting Regulations, Small Game Hunting Regulations and the Trapping Regulations.

All SHLs expire on June 30 following the date of issue.

For more information, contact your ENR regional office nearest you (see page 60).

Do You Need an Outfitter
Non-residents and non-resident aliens require an outfitter to hunt big game (but not small game). Outfitters provide licenced guides for the hunters they serve. For information on outfitters in the NWT, contact NWT Tourism (see page 60).
**Your Licence**

You must have a hunting licence to hunt small game. To hunt big game you need a hunting licence and wildlife tag(s).

Wildlife tags are issued for each species. The tags are part of your licence and must be attached to the animal immediately after the kill. Your hunting licence and wildlife tags must be carried with you when hunting.

Licences and tags may be purchased from most ENR offices in the NWT. In Yellowknife and some of the larger communities, licences and tags may also be purchased from vendors. However, big game licences and tags for big game species hunted by non-residents and non-resident aliens may only be purchased at ENR offices.

A licence is not valid until signed by the person to whom it has been issued. A licence is not transferable.

While people holding a General Hunting Licence do not have an expiry for their lifetime, other licences and tags are issued for one year starting 1 July and ending 30 June. The licence is valid for a species only during an open season for that species.

If you lose your licence, you must report this loss to a Renewable Resource Officer, who will, after you have signed an affidavit, issue a replacement for a fee of $22 plus GST. If you lose tags, the replacement cost for each is the same as the price for the original.

---

**ATTENTION RESIDENT HUNTERS**

**We Need Your Help – NWT Resident Hunter Harvest Surveys**

Each fall, an NWT Resident Hunter Harvest Survey is sent to all resident hunters who purchased a resident big or small game hunting licence during the previous hunting season. The survey asks hunters to provide information about hunting effort and harvests. The next questionnaire will request information about the previous hunting season.

The information you provide in the Resident Hunter Harvest Survey is necessary for effective wildlife management in the NWT. The survey results provide insight into hunting activities and success, composition of the harvest, wildlife management area use and estimated total harvests. This information is vital for understanding factors affecting northern species and helps wildlife managers make the best decisions possible.

We appreciate the efforts made by resident hunters who have completed the survey in the past. The more people who respond to this survey, the more accurate the estimate of total resident harvest will be. It is this relationship between responsible hunters and wildlife management agencies that will allow the sustainable continuation of the hunting tradition. Thank you.

Complete results will be sent with your questionnaire in the fall. Should you have any comments or questions about the survey or its results please contact us at:

Wildlife and Fish Division  
Environment and Natural Resources  
Box 1320  
Yellowknife, NWT X1A 2L9  
E-mail: wildlifeobs@gov.nt.ca  
Phone: 867-767-9237 ext. 53220

---

**Fees**

**Licence/Tag Fees:** For all classes of hunters, fees must be paid before you go hunting.

**Harvest Fees:** Must be paid by non-resident and non-resident aliens for each big game animal successfully harvested regardless of export. (see pages 22-49 for specific fee information).

**All fees are subject to the 5% Goods and Services Tax.**

---

Thank you for hunting safely and responsibly.
SUMMARY OF HUNTING REGULATIONS

General Prohibitions
No one may chase, harass or molest wildlife. Anyone who wounds wildlife shall make every reasonable effort to retrieve it and, if it is alive, to kill it.

It is an offence to waste, destroy, abandon or allow to spoil the following edible parts:

- Backstraps, hindquarters above the knee, front quarters above the knee, tenderloins, rib meat and neck meat for bison, caribou (all types), deer (all types), elk, moose and muskox.
- Excluding rib meat, the same edible parts apply to mountain goat and Dall’s sheep.
- Breast meat for migratory game birds and upland game birds.
- The edible parts of a bear, beaver or muskrat when harvested for meat.

Meat contaminated by gut content and shot damaged parts of the carcass may be cut away and left behind. Shot damaged means:

a) meat that has been torn by the shot or by bone broken by the shot; or
b) meat that has become blood-clotted as a result of the shot.

No one shall hunt wildlife with a device that is in an unsafe condition, discharge a firearm from, along or across a public road or without due regard for the safety of other people and property. When harvesting wildlife no person can have poison, explosives or explosive projectiles, tracer ammunition, set guns or automatic weapons.

The rules of hunting are designed to ensure that people hunt safely and that wildlife will be conserved for future generations. Should an individual be convicted of an offence, he or she could receive a fine and/or a jail sentence for each offence and for each day that the offence continues. Firearms, equipment and wildlife seized from the person could be ordered forfeit and the person’s licence could be suspended or cancelled.

Bow Hunting
Bow hunting is permitted in the NWT and is subject to the same regulations as hunting with a firearm. Draw weight must be at least 20 kg at 700 mm draw. Arrows must have a broadhead point width of at least 25 mm at the widest point or a barbless three-bladed bodkin head. Crossbows may be used for hunting in the NWT. Draw weight must be at least 68 kg at 700 mm draw and have a bolt weight of 16.2 g or have a bolt with a 2.2 cm diameter cutting broadhead.

Where to Attach Tags
Remember unless you have an Aboriginal right or otherwise are required in regulation to use a tag that tags are your authority to possess game. They must be attached as soon as you have killed your animal and remain attached until it is consumed or processed. Tags cannot be reused.

Harvesters are issued one tag for every animal they intend to hunt. This tag must be attached to the carcass of any big game killed except muskox, bear, wolf and wolverine. For these four species, the tag must be attached to the hide.

Non-residents and non-resident aliens are issued two identically numbered tags for each animal they intend to hunt. One tag must be attached to the carcass and the other to the horns, antlers, head or cape. However, for muskox, bear, wolf and wolverine only one tag is issued and must be attached to the hide of the animal they kill.

Anyone who shoots a Dall’s sheep must take the head to a Renewable Resource Officer to have a plug inserted into the horns if they intend to export the head from the NWT.

Tagged or Collared Animals
To better manage our resources, there are several species being actively monitored and may be tagged or wearing a radio collar. Although it is not illegal to shoot them, please try to avoid shooting these animals when possible. If an animal taken is wearing a radio collar or ear tag, we ask that you return these to the local Renewable Resource Officer and provide information relating to the harvest (date, location, etc.). If removing a collar from a harvested animal, please avoid destroying the collar – unscrew it and do not cut it off. We also ask that you report any sightings of collared or tagged animals to the nearest Renewable Resource Officer, giving them any information they may require such as the condition of the animal, location, etc. For a list of animals currently being studied, please check with a Renewable Resource Officer prior to your hunt.

The Department of Environment and Natural Resources may request a small tissue or hide sample from harvested wildlife in some areas. Your cooperation is appreciated while these studies are being conducted.
Diseased or Scavenged Animals
Although most wild animals are healthy, diseases and parasites can occur in any wildlife population. Some diseases, such as rabies in foxes and brucellosis in caribou, occur regularly in the NWT. Parasites, such as tapeworm cysts and sarcocystis in meat and hydatid cysts in lungs, are not uncommon in big game species. Some of these diseases can infect domestic animals or humans.

If a harvester has reasonable grounds to believe that harvested game is diseased and wishes to leave the game in the field, or the game has become inedible due to a scavenger, the harvester must:

• Where applicable, attach a tag to the big game if it is reasonably practicable to do so, or seal a tag if it is not reasonably practicable to attach it;
• Report to a Renewable Resource Officer, as soon as practicable, the location of the harvested big game or wildlife and the grounds for the harvester’s belief that the big game or wildlife is inedible; and
• Act in accordance with the directions of the Renewable Resource Officer.

If you do shoot a sick animal take the following precautions: do not cut into diseased parts; wash your hands and knives when finished butchering; and do not feed the meat or organs of infected animals to dogs. Take samples from the sick animal and report to the nearest Renewable Resource Officer.

Regardless of harvest, please report all observations of diseased wildlife to the nearest Renewable Resource Officer. They are the only ones authorized to dispose of diseased animals.

Caching
A hunter may temporarily leave harvested game on the land. Cached game meat must be protected from being disturbed by other animals or the natural environment. The harvester must mark the cache with the name of the harvester, licence number or identification number, and signature. You should return to retrieve your meat as soon as possible to prevent wastage. Weather-proof meat cache tags will be available at your local ENR office, free of charge.

Reporting Vehicle Collisions
If you accidentally kill or seriously wound any big game with a vehicle, you must report the incident to a Renewable Resource Officer within 24 hours. You must provide the name of the person who killed or seriously wounded the wildlife, an explanation of the incident, the time, date and location of the incident, the species and quantity involved, and any other information requested by an Officer. You may also report incidents by calling 1-866-762-2437.

Possession of Wildlife
Licenced hunters are entitled to possess all the meat and wildlife parts they legally harvest. Resident, non-resident and non-resident alien hunters must keep their tags and licence as proof of legal possession until all meat is consumed. Resident, non-resident and non-resident alien hunters may not sell their meat without a permit or commercial tag. All hunters can sell, trade or gift the inedible parts of wildlife that they have lawfully harvested under the authority of a licence.

Any person may receive a gift of meat of wildlife from a person who lawfully harvested it. Where a gift of meat weighs 5 kg or more, the recipient must ensure that the meat is labelled or get a receipt indicating the:

• Harvester name;
• Licence number or identification number of the harvester, or the name of the local harvesting committee or Indigenous organization in which the harvester is a member;
• Signature of the harvester;
• Date of the transaction;
• Species of game the meat came from; and
• Weight of the meat.

Finalized land claim agreements in the NWT set out the rights of participants respecting the harvesting of wildlife, including trading, gifting, possession and transportation.
SUMMARY OF TRAPPING REGULATIONS

It is an offense to waste, destroy, abandon or allow to spoil a raw pelt or hide of the following furbearers:

- Bear
- Beaver
- Coyote
- Ermine
- Fisher
- Fox
- Least Weasel
- Lynx
- Marten
- Mink
- Muskrat
- Otter
- Skunk
- Wolf
- Wolverine

The raw pelts or hide of bear, beaver or muskrat can be discarded if any of these furbearers are harvested for their meat.

Killing trap means an approved trap, set to kill an animal as soon as possible after the animal is caught; trap means any device, other than a firearm, designed and commonly used to capture or kill furbearing animals.

A person who holds a licence that authorizes trapping and uses live hold traps shall inspect the live hold traps at least once every 72 hours.

No person, other than an officer, may remove, molest, spring or interfere with any equipment legally set for trapping furbearing animals.

If you are trapping with a General Hunting Licence or intending to submit your fur to the Genuine Mackenzie Valley Fur Program, then any equipment used to hunt furbearing animals must be removed or rendered harmless on or before the last day of each season. Such equipment may not be set before the first day of a season.

An officer may seize, for examination, any wildlife that he/she believes is diseased.

Carcass and Sample Collections

Carcasses or sample kits from various species of wildlife are being collected in various areas of the Territories. These collections provide information on age and sex, reproduction and body condition. All carcasses must be tagged with your name, date caught and location. Sample kits ask for specific information. Contact your local Renewable Resource Officer for more information.
Exporting Wildlife from the NWT
All non-resident and non-resident alien hunters must obtain an export permit before exporting meat or any part of big game. Resident hunters do not require an export permit to export wildlife they have legally harvested. Gifts of meat require an export permit if they exceed 10 kg. Anyone exporting wildlife is encouraged to check the requirement of the jurisdiction the wildlife is being exported into as an export permit may be required by the receiving jurisdiction. Wildlife parts must be presented for inspection when the export permit is being obtained. Permits will not be issued after the items have been exported.

There is no fee for an export permit. However, non-resident and non-resident alien hunters are required to pay a harvest fee when big game has been successfully harvested regardless of export.

Certification is required before exporting Dall’s sheep horns from the NWT. Other species that may require certification are: birds of prey, bison, grizzly bear, polar bear and muskox.

A CITES permit is required for all parts of the following big game species leaving Canada: grizzly bears, black bears, polar bears and wolf. You must have a CITES permit for these harvested animals before you leave Canada.

Some exemptions allow an individual to export or import some tourist souvenir items acquired during the trip. To avoid confiscation of items, always check the regulations with a wildlife or customs agency of the country into which you plan to import.

CITES permits are available online at www.ec.gc.ca. It may take up to 80 calendar days to obtain a CITES permit, so apply well in advance.

Harvesting Wildlife on Private Lands
It is against the law to harvest wildlife on private lands in a land claim area without permission. All harvesters must ask permission before entering land claim private lands to harvest wildlife unless they have rights in the area.

Harvesters are ultimately responsible for knowing where they are on the land, following the law, and meeting the terms and conditions specific to land claims.

People who harvest on private lands without permission can be charged under the Wildlife Act.

Please be mindful of traditional use areas when you are harvesting. There are many local harvesting committees, local band councils and Métis councils throughout the NWT, and each may have their own traditional protocols for other people who are hunting in their traditional use area.

Asking permission to harvest wildlife on private lands shows respect and helps develop a relationship between harvesters and land owners. Land owners will know who is harvesting in their area and can identify areas to be avoided. These may include culturally sensitive areas.

Entering private lands without permission can also be a safety issue, especially if traps are set in an area. Remember, it is your responsibility to know the boundaries of land claim areas and private lands.

Always practice safe, respectful and ethical behaviour when harvesting wildlife.

Your regional or local ENR office can provide additional information.
The Mile 222 Wildlife Check Station will be operational during the hunting season to monitor harvest activity, collect biological samples and issue export permits. All visitors and harvesters are asked to sign in at the check station. This helps ensure compliance with licence and authorization requirements and with public safety in the area.

NWT resident hunters, GHL holders and NWT Aboriginal harvesters do not require an export permit to remove wildlife from the NWT. However hunters passing through other Territories and Provinces may wish to acquire a free export permit to avoid complications in other jurisdictions.

Please note that the ENR leased property at the Mile 222 Wildlife Check Station is restricted to operational requirements and only for use of the department. Use, storing of hunting equipment, vehicles, trailers, wild game or camping on ENR’s leased property is not authorized. Harvesters should also be aware that Sahtú Private Lands surround the Canol Trail at various locations. A 30 metre buffer of Crown Land exists outward from the center line of the Canol Trail on either side. Licenced hunters may only harvest on vacant Crown Lands.

For more information about harvesting on Sahtú private land hunters need to contact the Norman Wells Renewable Resource Council at (867) 587-2455 or email nwrnc@nwlc.ca
Inuvialuit Settlement Region (ISR)

Hunting in the ISR is subject to terms and conditions in accordance with the Inuvialuit Final Agreement (IFA). Non-beneficiaries must ask for and receive permission to access Inuvialuit private lands within the ISR before they can hunt. Non-beneficiaries must receive permission from the local Hunters and Trappers Committee (HTC) before hunting grizzly bear, polar bear, black bear, muskox, wolf and wolverine anywhere within the ISR.

For further information, contact the Inuvialuit Land Administration at 867-977-7100, the applicable HTC office: Aklavik 867-978-2723, Inuvik 867-777-3671, Olokhaktomiut (Ulukhaktok HTC) 867-396-4808, Paulatuk 867-580-3004, Sachs Harbour 867-690-3028, or Tuktoyaktuk 867-977-2457, and/or your local Renewable Resource Officer in Inuvik (867-678-6650).

Inuvialuit Settlement Region in the NWT

All Inuvialuit private lands in the ISR are shown in white.
**AREAS REQUIRING PERMISSION**

**Gwich’in Settlement Area (GSA)**
Hunting in the GSA is subject to terms and conditions in accordance with the Gwich’in Comprehensive Land Claim Agreement (GCLCA). Non-participants must ask for and receive permission to access and hunt on Gwich’in Settlement Lands (private lands).

There are Special Harvesting Areas within the GSA that allow for certain hunting; however, they may also have additional terms and conditions. These areas are set out in Schedules V through VIII of the GCLCA.

For permission to hunt on Gwich’in settlement lands, contact the applicable RRC: Ehdiitat (Aklavik) 867-978-2340, Tetlit (Fort McPherson) 867-952-2330, Nihatat (Inuvik) 867-777-6652, or Gwichya (Tsiigehtchic) 867-953-3603. For wildlife management questions in the GSA, contact the Gwich’in Renewable Resources Board at 867-777-6600.

For further information on sport hunting in the GSA, contact the local Renewable Resource Officer in Inuvik (867-678-6650).

---

**Gwich’in Settlement Area in the NWT**
Gwich’in settlement lands are shown in white.

This area is subject to Inuvialuit Final Agreement (IFA). You still require permission and must abide by the IFA. See p.8.

---

---

---
**AREAS REQUIRING PERMISSION**

**Sahtu Settlement Area (SSA)**
Hunting in the SSA is subject to terms and conditions in accordance with the Sahtu Dene and Métis Comprehensive Land Claim Agreement. Non-participants must ask for and receive permission to access and hunt on Sahtu Settlement Lands (private lands).

There are special harvesting areas within the Sahtu settlement lands for moose that may also have additional terms and conditions. These areas are set out in Schedules V through VII of the Sahtu Dene and Métis Comprehensive Land Claim Agreement.

For permission to hunt on Sahtu Settlement Lands, contact the applicable RRC: Norman Wells (867-587-2455), Fort Good Hope (867-598-2193), Colville Lake (867-709-2200) or Tulita (867-588-4724); or the Délı̨nę Got’ı̨nę Government (867-589-4224). For wildlife management questions in the SSA, contact the Sahtu Renewable Resources Board at 867-588-4040.

For further information on sport hunting in the SSA, contact a local Renewable Resource Officer in Norman Wells (867-587-3500).

**Sahtu Settlement Area in the NWT**
Sahtu Settlement Lands are shown in white.
Hay River Reserve

The Indian Act applies to reserves and Indian Act bands who may have established their own requirements applicable to hunting on their reserves.

For further information, contact the K’atlodeeche First Nation (867-874-6701) and/or your local Renewable Resource Officer in Hay River (867-875-5550).
AREAS REQUIRING PERMISSION

Salt River First Nation Reserve and Salt Plains Reserve No. 195

The Indian Act applies to reserves and Indian Act bands and allows them to establish their own requirements applicable to hunting on reserves.

For further information, contact the Salt River First Nation #195 (867-872-2986) and/or your local Renewable Resource Officer in Fort Smith (867-872-6400).

Salt River First Nation Reserve and Salt Plains Serve No. 195 in the NWT

All reserve lands set aside for the SRFNR and SPIR 195 are shown in white.
AREAS REQUIRING PERMISSION

Wek’èezhìı and Tłı̨ch’o Lands

Hunting on Wek’èezhìı and on Tłı̨ch’o lands is subject to terms, conditions and provisions of the Tłı̨ch’o Agreement.

A request to the Tłı̨ch’o Government or local community government to harvest wildlife on Tłı̨ch’o lands is not required. However, asking permission to harvest on Tłı̨ch’o lands is encouraged because it shows respect for the Tłı̨ch’o tradition.

For further information, contact the Lands Protection Department of the Tłı̨ch’o Government (867-392-6381, ext. 1356) or the Wek’èezhìı Renewable Resources Board (867-873-5740) and/or your local Renewable Resource Officer in Behchokǫ́ (867-392-6511).

Wek’èezhìı Resource Management Area in the NWT

All private lands in the WRMA are shown in white.
Ingraham Trail Development Area

The Department of Lands has established an area along the Ingraham Trail in which the discharge of a firearm is prohibited within 1.5 km of either side of the centre line of the highway. This is in effect year round.

This area was created to afford leaseholders and people enjoying recreational activity protection from firearm use. For details regarding this area, please contact the North Slave ENR Office (see page 60).

SANCTUARIES AND PARKS

Territorial Parks

Residents, non-residents, and non-resident aliens are not permitted to hunt within territorial parks in the NWT.

National Parks, Park Reserves and Protected National Historic Sites

As prescribed in federal legislation, residents, non-residents and non-resident aliens are not permitted to hunt in the national parks and national park reserves of the NWT.

National Parks: Wood Buffalo, Tuktut Nogait, Aulavik
National Park Reserves: Nahanni, Nááts’ihch’oh, Thaidene Nene
Protected National Historic Sites: Saoyú and Ñehdacho

For more information, please visit:

MIGRATORY BIRDS

A Migratory Game Bird Permit and a Habitat Conservation Stamp are required to hunt migratory birds (ducks, geese, coots, or snipe). This 2019-2020 permit is also required to hunt Snow and Ross geese in spring 2020. Non-toxic shot must be used to hunt Migratory Birds. Permits are available from any Canada Post office or online at www.prmis-permits.ec.gc.ca.

Information on seasons, bag limits and fees is available from the Canadian Wildlife Service (CWS) or outlined in a brochure that can be obtained from a post office. This information can also be found on the Environment and Climate Change Canada website: www.ec.gc.ca.

If you harvest a bird wearing a band, please report the information at www.reportband.gov or call toll free 1-800-327-band (2263) to leave a message.

A Migratory Bird Sanctuary Permit may be required for anyone wishing to access, hunt, or carry a firearm within Migratory Bird Sanctuary boundaries. This does not apply to Indigenous people’s exercising their rights under their land claims agreement. For a list of federal Migratory Bird Sanctuaries or to apply for a permit, contact: ec.nupermisscf-cwspermitnu.ec@canada.ca or:

Canadian Wildlife Service
5019 – 52nd Street
Yellowknife, NT X1A 2P7
Office: (867) 669-4754
Fax: (867) 873-6776

Requirements for firearm licences and registration are governed by the federal Firearms Act. Check with the Canadian Firearms Centre (1-800-731-4000) or www.rcmp-grc.gc.ca for more information.

For the purpose of hunting big game, rim fire ammunition is illegal.

Ammunition containing non-expanding bullets, steel-jacketed bullets or tracer ammunition may not be used for hunting.

When hunting small game and migratory game birds, no one may use a shotgun that holds more than three shells in the magazine and firing chamber combined.
**Basic Hunting Equipment Checklist**

Experienced hunters often use a checklist to prepare for a hunting trip. This allows a hunter to efficiently prepare for a hunt and ensure no gear is forgotten. Below is an example of a basic checklist of essentials.

**Basic Hunting Equipment:**
- Survival kit
- Emergency first aid kit
- Hunting licence and tags
- Firearm/bow
- Extra ammunition
- Firearm cleaning kit
- Sizeable pack
- Breathable game bags (cheesecloth)
- Binoculars/spotting scope
- Map, compass and GPS
- Flashlight/headlamp
- Duct tape
- Radio or phone communications
- Personal Emergency Location Transmitter
- Whistle
- Rope
- Sharp skinning knife and camp knife
- Axe/folding saw
- Fire-starter/flint/matches
- Cold weather and rain gear
- Long underwear
- Hiking/winter boots
- Single burner stove and fuel
- Water
- Food for length of trip and extra

* This checklist contains basic gear recommendations for any hunting trip. Each hunter should adapt this list to fit their specific hunting trip, which may include further gear requirements (i.e. sleeping bag, tent). This list is not meant to be exhaustive or complete.

**HOW TO USE THE HUNTING TABLES AND MAPS**

Holders of Resident, Non-resident and Non-resident Alien Hunting Licences are prohibited from hunting in any territorial parks, national parks or park reserves. Only some small game species are protected in a wildlife sanctuary or preserve. All protected areas are shaded dark grey on the Wildlife Management Zone Map. Protected areas are shaded dark grey on the species specific Wildlife Management Area Maps when you cannot harvest there. Hunting regulations are changing in new protected areas.

The NWT is divided into wildlife management zones. The maps on pages 18 and 19 of this booklet outline these units represented by the letters D, G, I, R, S and U.

Within the wildlife management zones, species management areas for certain animals are represented by a two-letter code and two-digit number:
- **PB** polar bear
- **GB** grizzly bear
- **WB** wood bison
- **BC** barren-ground caribou
- **MX** muskox
- **WF** wolf
- **WV** wolverine

Maps of the hunting areas for different species in the wildlife management zones are also illustrated.

Examples of how to interpret the coding of the different hunting area names:
- **D** Hunting is allowed in all of zone D for the specific animal
- **I/MX/01-04** Muskox hunting is allowed in areas 01, 02, 03 and 04 of unit I
- **G/OT/01** Outfitter hunting is allowed in area 01 in zone G

**Harvester Abbreviations**

- **AH**: Aboriginal harvester in harvester’s traditional area
- **RES**: NWT Resident Hunting Licence holder
- **GHL**: General Hunting Licence holder
- **NR**: Non-resident Hunting Licence holder
- **NRA**: Non-resident Alien Hunting Licence holder
WILDLIFE MANAGEMENT ZONES OF THE NORTHWEST TERRITORIES

[Map showing wildlife management zones with labels such as Aulavik National Park, Sachs Harbour, Ulukhaktok, and other places.]
In the Mackenzie Mountains in wildlife management zones D, G and S, there are eight hunting areas referred to as outfitter areas. These management areas are represented by the wildlife management area letter, followed by the two-letter code OT and a two-digit number. Similar to all other hunting areas in the NWT, resident hunters do not require an outfitter to hunt in these areas.

There is no hunting of big game until 12 hours has passed after the termination of an aircraft, including a helicopter, flight into D/OT/01-02, G/OT/01, S/OT/01-05. For more information on harvesting along the Canol Trail, see page 9.

This map shows the detailed outfitter areas in the NWT. These management areas apply to non-resident and non-resident alien hunters who plan to hunt black bear, northern mountain caribou, mountain goat, moose, Dall’s sheep, wolf and/or wolverine. Contact NWT Tourism for a list of licenced outfitters (see page 60).
BIG GAME SPECIES

July 1, 2020 to June 30, 2021
Northwest Territories Summary of Hunting and Trapping Regulations

Photo Credit: Donny Allaire

Black Bear
All licenced hunters flying into wildlife management areas S/MX/01 and R/BC/01 must wait 12 hours after landing before hunting. Also if you are flying within the Outfitter Areas of the Mackenzie Mountains, you must wait 12 hours after landing before hunting any big game. This is to prevent aircraft from giving hunters more than a sporting chance. It does not stop licenced outfitters from making preparations for the client.

Successful hunters must turn in the lower jaw or undamaged post-canine tooth and information that an officer requires as soon as practicable after the bear is killed.

NOTE

PROBLEM BEARS

In the NWT, it is legal to shoot a bear in self-defence of life or property. You must report the kill to a Renewable Resources Officer as soon as possible and provide an explanation of the incident, the date and location of the incident, and any other information requested by an Officer. You may not keep any part of a bear killed in self-defence. You can report incidents by calling 1-866-762-2437.

(a) A grizzly bear cub has a hide measuring less than 1.4 m from the tip of the nose to the end of the tail when fresh, and less than 1.6 m when stretched and dried.
(b) If an unsuccessful resident grizzly bear tag holder fails to return their tag within 15 days after their hunt, they shall be deemed to have killed a bear and no further tags will be issued to that individual.
(c) All hunters who buy grizzly bear tags are asked to complete a questionnaire regardless of the hunt’s outcome. Unsuccessful hunters must return unused tags immediately after the hunt.
(d) If you are not a beneficiary of the Inuvialuit Final Agreement, you must receive permission to hunt grizzly bear anywhere in the ISR. For more information, contact the applicable offices in the ISR - see page 10.
(e) Under the Management Agreement for Grizzly Bears in the Gwich’in Settlement Area, all hunters who wish to hunt grizzly bears in G/OT/01 should request permission to the GRRB or the local RRC. For more information, contact the local RRC or the GRRB - see page 11.
(f) Mandatory reporting and sampling requirements.
(g) Contact the Gwich’in Renewable Resources Board for more information on the quota.

**NOTE**

If you are flying within the Outfitter Areas of the Mackenzie Mountains, you must wait 12 hours after landing before hunting any big game. This is to prevent aircraft from giving hunters more than a sporting chance. It does not stop licensed outfitters from making preparations for the client.

Successful hunters must turn in the lower jaw or undamaged post-canine tooth and information that an officer requires as soon as practicable after the bear is killed.

**PROBLEM BEARS**

In the NWT, it is legal to shoot a bear in self-defence of life or property. </table>

Please note that where hunters are required to take males only, they must retain evidence of sex (baculum).

- The holder of a hunting licence may only hunt polar bear by dog team or on foot. Ammunition and firearms for a hunt must meet prescribed requirements. A successful hunter must provide information on the date and location of the kill and turn the lower jaw or undamaged post-canine tooth, evidence of sex and any lip tattoos and ear tags present. An unsuccessful hunter must return unused tags immediately after the hunt.

\(^{(a)}\) In the ISR, a polar bear is defined as having a hide measuring less than 1.5 m from the tip of the nose to the end of the tail when fresh, and less than 1.8 m when stretched and dried.

\(^{(b)}\) If you are not a beneficiary of the Inuvialuit Final Agreement, you must receive permission to hunt polar bear anywhere in the ISR and polar bear hunting boundaries are complex. Please contact the applicable offices in the ISR for more information and tag before starting the hunt - see page 10.

**PROBLEM BEARS**

Report all incidents of problems bears by calling 1-866-762-2437.

- To distinguish between a male and female caribou, check the sex organs before shooting. A mature male (bull) has a penis sheath that can usually be seen from the side. A female (cow) has a dark patch under her tail. This is the vulva. Please use caution and speak to an elder, experienced hunter or Renewable Resource Officer for more information. See page 60 for more information.

(a) Tag required.
(b) Male only.
(c) Mandatory reporting of harvest to local ENR office.
(d) All barren-ground caribou harvesting is prohibited in the Mobile Core Bathurst Caribou Management Zone. The map can be found at www.enrgov.nt.ca.

**NOTE**

Where hunters are required to take males only, they must retain evidence of sex (testicles or scrotum).

**USE OF AIRCRAFT**

If you are flying in R/BC/01, you must wait 12 hours after landing before hunting. This is to prevent aircraft from giving hunters more than a sporting chance.
NOTE
There are new season requirements and conditions for GHL and Resident Hunting Licence holders when hunting boreal caribou. Harvest is now male only and the season closes December 15th.

<sup>(a)</sup> Mandatory reporting required.  
<sup>(b)</sup> Tag required.
Dall’s Sheep
A legal Dall’s sheep is a ram with at least one horn that is 3/4 curl or larger. To check the curl, view the animal from the side and imagine a straight line from the base to the tip of the horn. If the line passes through the back corner of the eye, or anywhere forward of that, it is a legal ram. If the horn is broomed, imagine it as if it were whole and draw the same line. If it passes through the back corner of the eye, it is a legal 3/4 curl ram. Every Dall’s sheep horn, whether obtained through hunting or just picked up, must have a numbered plug inserted in it if being exported from the NWT.

### USE OF AIRCRAFT

If you are flying within the Outfitter Areas of the Mackenzie Mountains, you must wait 12 hours after landing before hunting any big game. This is to prevent aircraft from giving hunters more than a sporting chance. It does not stop licenced outfitters from making preparations for the client.
There are Special Harvesting Areas within the SSA that allow for hunting of moose; however, they also have additional terms and conditions. See page 20 for more information.

(*) There is no hunting of muskox until 12 hours has passed after the termination of the helicopter/aircraft flight into S/MX/01. This restriction applies to all classes of licence holders, including GHL holders.

(1) HTCs may or may not allocate any portion of the quota to this class of licence.

(2) Male only.

(3) Tags are available from local RRC, but must be validated at ENR.

(4) If you are not a beneficiary of the Inuvialuit Final Agreement, you must receive permission to hunt muskox anywhere in the ISR. For more information, contact the applicable offices in the ISR - see page 10.

(5) Mandatory reporting of harvest to local ENR office.

(6) Muskox tags are available to residents for Muskox Wildlife Management Area S/MX/01 and U/MX/01 throughout a yearly draw. Applications for the yearly draw are available after April 1 from the local ENR office. Applications must be postmarked before May 15 and received before the draw date. The draw will be held each year before June 1. Tags will not be awarded to a person that has received a tag for any of the previous four seasons. For more information, please contact the local Renewable Resource Officer.

NOTE
When hunting muskox, a hunter must not knowingly approach by vehicle (including a snowmobile or all-terrain vehicle) any closer than 1.5 km to the muskox.

USE OF AIRCRAFT
If you are flying in S/MX/01, you must wait 12 hours after landing before hunting.
White-tailed and Mule Deer

Northwest Territories Summary of Hunting and Trapping Regulations

46
### CHRONIC WASTING DISEASE (CWD)

CWD is a significant health issue that can impact all cervid species like caribou. As of July 2019, only deer harvested in the NWT or within 100 km of the NWT border will be free from the new possession restrictions. Outside of these areas essentially only boned out meat from deer will be allowed into the NWT, and that includes taxidermy mounts. Prescribed parts will only be accepted if tested to the satisfaction of ENR and proof of such testing is provided by the harvester/owner. Current owners of deer taxidermy mounts in the NWT will be exempt from the possession restrictions.

To be clear, the following harvested deer parts cannot enter the NWT from another jurisdiction:
- brain matter
- cranial nerves
- spinal column and its parts
- whole skulls or skull plates
- hooves
- boned in meat
- urine (this includes commercial products like lures)
- mammary glands
- velvet covered antlers

- Harvest have to carry their big tag while hunting. Mandatory reporting of harvest is to be submitted to ENR regardless of success.

(a) Tags on a quota system. Harvesters must obtain written approval from a local First Nation in order to obtain a tag. Contact the ENR office in Fort Simpson or Fort Liard for more information. Seven tags are available to GHL/resident hunters at local First Nations Acho Dene Koe Band (Fort Liard) and Nahanni Butte Dene Band (Nahanni Butte).

(b) Reporting on your hunt to ENR is mandatory whether or not an animal was taken. A report form is attached to the information package.

Please note that where hunters are required to take males only, they must retain evidence of sex (testicles or scrotum).

IF YOU SEE A BISON IN THE CONTROL AREA...

Please report it to ENR as soon as possible (Toll-free 1-866-629-6438) with as much detail as you can on the location. Immediate reporting increases our response success. The success of this program depends greatly on public cooperation and support.

In the NWT, two populations of disease-free wood bison have been re-established. The Mackenzie population is found north of the Mackenzie River and has been one of the cornerstones of the nation's wood bison recovery program. The Nahanni population occupies a range in the Liard and Nahanni River Valleys.

The greater Wood Buffalo National Park population, which includes bison in the Slave River Lowlands, is infected with bovine tuberculosis and brucellosis. In 1987, the Bison Control Area (BCA) was created to prevent the spread of these diseases to the healthy Mackenzie and Nahanni populations. The BCA program is jointly funded by the Parks Canada Agency and the Government of the NWT.

All bison in the BCA are presumed to be diseased and must be removed and tested.

For more information on the BCA, please visit the ENR website at www.enr.gov.nt.ca/services/wood-bison/bison-control-area.

Please report any bison sightings in the BCA as soon as possible to the nearest ENR office. Under the NWT wildlife regulations, a resident may, at any time, hunt bison within the BCA. A hunter who wounds or kills a bison in the BCA is required to report the incident as soon as practical. If you would like more information regarding the Bison Control Program, please contact any ENR office.

Phone Hay River (867) 875-5550, Fort Providence (867) 669-3002, Fort Smith (867) 872-6400, Fort Simpson (867) 695-7450 or Fort Liard (867) 770-4300.
Fees for all small game authorization are:

- Resident - $22.00
- Non-resident - $44.00
- Non-resident Alien - $110.00

For Aboriginal harvesters and GHL holders, there are no bag limits or season conditions unless noted below.

ENR hosts annual sight in your rifle events NWT-wide. Events are held to make sure hunter’s firearms are sighted properly to ensure accurate shots, reducing wounding and wastage. For more information of Sight in your Rifle events, contact your local ENR office.

**HOW TO SIGHT-IN YOUR RIFLE**

1. Set up a paper target with a safe backstop (the base of a hill, gravel pit, etc.) at 25 yards (23 metres). Place your rifle on a solid rest. Fire at least three test shots.

2. Check the target. If the group of shots is not at your point of aim, adjust the rear sight in the same direction you want to move your shots. This will help you make sure your next set of shots hit the target. Fire another group of at least three shots. If they are hitting at your point of aim, go onto step 3. If not, repeat steps 1 and 2.

3. Set a target at the furthest distance at which you expect to shoot big game, to see where your rifle hits at longer ranges. Adjust your sights to hit your point of aim at that distance.
Consistency is the key to good shooting. You want your test shots to strike close to each other. If the shots are not grouped together, it could be due to your technique or some other mechanical factor.

Note: These are general guidelines only. If you need more information or help with your technique, please talk to your local Renewable Resource Officer.

Sight rifle before hunting
Know and practice gun safety
Wear ear and eye protection when shooting
Wear sunglasses in spring

Conserve our wildlife resources. Hunt responsibly and safely.
FIELD DRESSING SMALL GAME

With the animal lying on its back, remove the head and cut the feet off at the joints. Slide your knife under the skin, cutting along each hind leg to the base of the tail. Cut the tail off from the base of the animal. Pull the skin off the entire animal, like a sock.

Place the skinned animal on its back and make a cut along the belly to the anus. Remove intestines and organs. Wash away any remaining blood or intestinal fluids.

FIELD DRESSING GAME BIRDS

When in the field, remove the innards/gizzard as soon as possible.

With the bird lying on its back, cut off the head, wings at the first joint, and feet. Make a small cut to the skin on the belly and rip open. Peel off the skin by working around the body, legs and wings, until all the skin is off. Cut under the rib cage to make a small opening. Reach in and slowly pull the innards/gizzard out. Wipe or wash the body cavity clean.

To breast the bird, cut down into the middle of the breast. Cut all the way down until you reach the rib cage. Carefully remove the breasts from the ribs by pulling the meat back while slicing the connecting tissue. This will produce two breast steaks.

Remember to wear rubber disposable gloves when cleaning your game.

Always cook game meat thoroughly to kill disease organisms and parasites.
FIELD DRESSING BIG GAME

BONING OUT
With the animal lying on its side, cut the hide lengthwise along the belly from the rear of the lower jaw to anus or brisket to anus if a shoulder mount is planned. Cut straight up the back of each leg from the knee to the centerline cut. Sever hide at knee joints. Skin the complete upper side of the animal to the backbone. Lay the hide on the ground still attached to the backbone.

Raise the front leg straight up and cut underneath (in armpit) to above the top of the shoulder blade. There is no bone to bone connection in the shoulder. Remove the leg to a tarp or other clean area.

Raise hind leg and carefully cut away along pelvis. Keep raising and cutting until ball and socket joint is exposed and severed. Continue cutting close to the pelvis until the whole leg is severed.

Remove the backstrap by cutting a deep “V”. The first cut is down along the backbone from the base of the neck to where the hind leg was removed. Then cut up towards the first cut along the top of the rib cage. The backstrap should come off in one long piece.

Filet slabs off the exposed side of the neck.

Roll the carcass over onto the hide to expose the other side and repeat cuts done of the first side.

1 Tender Cuts
   Use dry heat.
   Roast, fry, broil, barbeque.

2 Medium Tender Cuts
   Use dry or moist heat.
   Moist heat for extra tenderness.

3 Less Tender Cuts
   Use moist heat methods.
   Braise, pot roast, stew.
BE BEAR AWARE!

Three kinds of bears live in the NWT: black, grizzly and polar. The following tips will help you reduce encounters with a bear.

**While hunting...**
- Carry bear deterrents and make sure you know how to use them. Remember that an animal call may also attract a bear.
- Be cautious when tracking a wounded animal.
- If you see a bear, leave the area. Don’t risk an encounter.

**After you kill an animal...**
- While field dressing the carcass, be aware that the scent may be attracting a bear. Make noise so nearby bears know that you are in the area.
- Remove the carcass as quickly as possible.
- Do not drag the carcass back to camp. Doing so will leave a scent trail that a bear can follow directly to your camp.

**Returning to the carcass later...**
- Separate the carcass from the gut pile. Bears will often be attracted to the gut pile first.
- When returning to the kill site, use caution. Approach the site from upwind, use binoculars to see if the site is clear and make as much noise as possible.

**Once you have finished butchering your carcass...**
- Stash blood-soaked clothing in a plastic bag at the same location as your meat.
- Wash thoroughly before entering your sleeping quarters.
- Never trim hides or meat around camp; the scraps will attract scavenging bears long after you leave.
- Keep your meat and hides at least 100 m away from your campsite.

Bear safety videos are available from Distribution Access: Phone: 1-866-999-5292, or through their website at www.distributionaccess.com.

Wildlife violations are serious offences. Violators, including poachers, deplete wildlife populations and destroy natural habitat. If you see something suspicious or illegal, please report as much detail as possible, including date, time, location, vehicle licence plate, air registration letters or boat registration number, and the nature of the incident.

To report a wildlife violation, call 1-866-POACHER (762-2437). This toll-free line is open 24 hours a day, seven days a week.

Call 1-866-762-2437. Information provided on the line is passed on to a Renewable Resource Officer.
